

Help Your Customers Quit Smoking

Attention Retailer:

Have any of your clients or employees ever talked about quitting smoking? Would you help them quit if you could - and make money in the process! If you want to increase your bottom line in these tough economic times, read on and see how. Our all-natural quit smoking aid, **Butt it Out™** can do this for you! This herbal quit smoking aid will create a real buzz in your establishment! 65% of all smokers want to quit. Now you can help them and enjoy healthy profits at the same time! **WIN-WIN.**

Repeat sales generated should be excellent as the product instructions recommend the use of this OTC medicine for a period of 3 months. Word of mouth has also been a determining factor in the generation of new sales.

Butt it Out™ has helped tens of thousands of people to quit smoking! This 'Traditional Herbal Medicine' has been featured in numerous magazines, newspapers, radio and TV stations across United States and Canada. **Featured in 'Spa Canada Magazine' and on 'The VIEW' with Whoopi Goldberg & Barbara Walters on Oct.29/2007.**

How it Works: The active ingredient, lobelia inflata, stimulates the same receptors in the brain as nicotine.

This action relieves the cravings and withdrawal symptoms that you can get when you stop smoking. This herbal medicine is also recognized as an **appetite suppressant** - great news for those smokers who are afraid of gaining

weight when they quit. **Butt it Out™** is non-addictive and also approved for teenagers to use safely.

Each bottle contains 90 capsules which is a one month supply of medicine. This medicine is much less expensive and much safer to use than nicotine replacement products. **Butt it Out™ reduces the desire to smoke and is clinically proven to ease withdrawal symptoms.**

Approved for Teenagers

100% Natural

Route of Administration: Oral

Form: Capsules

Dosage: 3 caps daily until desire for nicotine is alleviated

Contents: 90 caps per bottle/30 day supply

ACTIVE INGREDIENT INFORMATION

Nicotine targets a group of cells (nicotine receptors) deep within the center of the brain that causes pleasurable sensations. The main ingredient of this herbal formula (lobelia inflata) is known to bind up these cells. This action blocks nicotine from reaching these nicotine receptors in the brain, thus reducing the desire to smoke. The basic physiological action of lobelia resembles that of nicotine but lobelia is non-addictive.

We consider lobelia to be Mother Nature's alternative to Nicotine patches, Gums, etc. This valuable herb was traditionally used by naturopath physicians and herbalists as a QUIT SMOKING AID until Health Canada made lobelia a "restricted herb" and illegal to use as a quit smoking aid unless a D.L.N. was applied for and approved.

This Herb is recognized as helping to ease withdrawal symptoms. The main ingredient is also recognized as being a stress reliever and appetite suppressant, because it also "mimics" nicotine, your body actually thinks that you are receiving nicotine, when you are not. This is why it is said to help alleviate withdrawal and lessen the desire to smoke.

This herbal medicine is recognized by Health Canada as a Quit Smoking Aid.

Weight gain is minimal because Butt.itOut contains a very effective Appetite Suppressant. Don't waste your hard earned money on expensive patches or gums that keep you addicted.

Nicotine in any form is poisonous and addictive!

Quit smoking the Natural Way!!

HOW TO USE THIS MEDICATION

Take 3 capsules daily. We recommend that you take 1 capsule a half-hour before each of your 3 daily meals. Many smokers find that their worst cravings for nicotine occur after they eat and this is why we make this recommendation. As smoking is one of the toughest addictions to conquer, we recommend that you continue taking the medicine for 3 months. The longer you are free of the nicotine, the better your chances of staying quit! This also gives your body some time to expel the toxins and pollutants received from smoking.

If you have never tried to quit smoking before, expect to find the first few days a little rough, but remember, the end result will be worth it.

Withdrawal Means Recovery!

Common withdrawal symptoms of quitting smoking could include trouble sleeping (avoid caffeine late in the day and practice relaxing), sore throat and dry mouth (drink lots of water or fruit juice), coughing (try cough drops & herbal teas), irregularity (include roughage like raw fruits, vegetables and whole grain cereals in your diet), fatigue (go to bed earlier and get more exercise), irritability (practice stress management exercises like deep breathing) and poor concentration (again, deep breathing and exercise will increase the supply of oxygen to your brain and help you avoid the 'spaced out' feeling).

CONTRA-INDICATIONS

- Nervous prostration shock and paralysis
- In general relaxation
- In dyspnoea from enlarged or fatty heart

Isn't it time to Quit??
